

*Hey,
bravehearts!*

Anybody home?

About
500
Romanian
children

the problem

are being
diagnosed
with cancer
every year.

For **20%**
of these
children,
***this is
home.***

the problem

- > extreme poverty
- > houses with no heating or running water
- > conditions that are not suitable for child-rearing nor medical recovery
- > single-room homes regardless of the number of family members.

Family expenses increase by **up to 80%**

the problem

after a child is being diagnosed.

Revenues decrease as parents lose their jobs.

A photograph of a modern building with a yellow chevron graphic above it and a dotted line pointing to the ground. The image is overlaid with a semi-transparent purple filter. The text "The solution?" is written in a bold, white, italicized font across the center of the image.

The solution?

***We build them
proper homes***

Producing houses

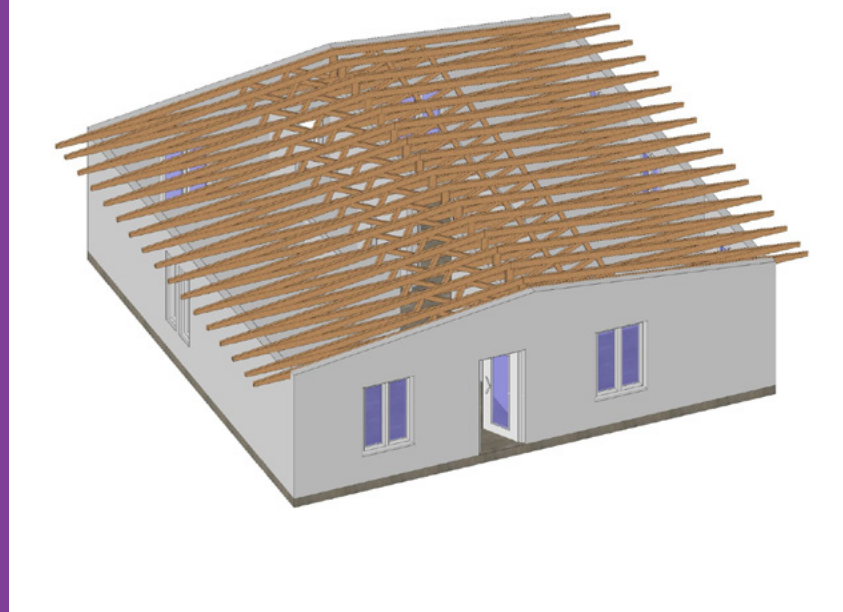

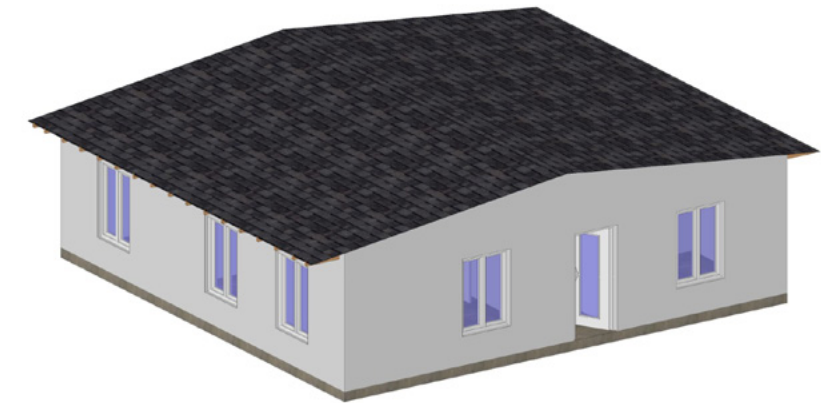

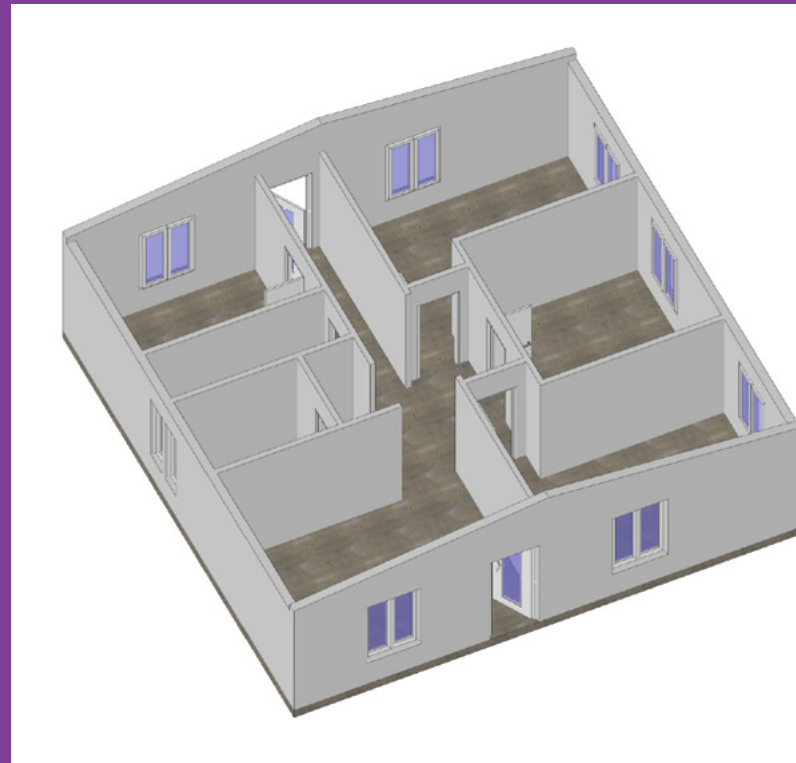

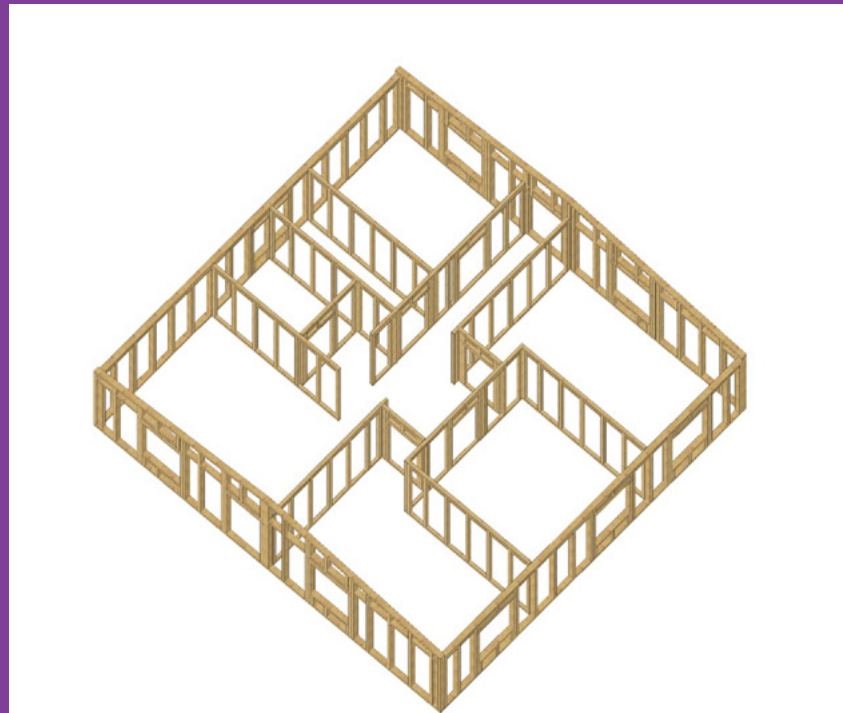

October 2019

Assambling in location

It looks like a small house, but it's a **magic roof**.

100 square meters
3 bedrooms
1 living room
one kitchen
2 bathrooms and
a technical room.

The modular structure is made of wooden frames, designed so that it can be easily modified according to the needs of the beneficiaries and the maintenance costs are minimal.

It can happen
like hocus-pocus,
if you **decide to**
contribute.

Partners

MagiCAMP is one of the leading charity organisations in Romania focused on the design and delivery of services, science-based interventions and technologies to improve the health and well-being of children teens and young adults diagnosed with cancer and other severe conditions.

Since 2014, MagiCAMP offers summer camps, accomodation, material and financial support and a lot more.

Leviatan and **supernovator** are professional teams of architects, structural engineers, interior designers, installations engineers, project managers offering quality to each project developed, having as common objective value and result providing, professional services, as well as sustainable and innovative solutions for any client.

The Technical University of Construction Bucharest is a regional pole of excellence in education and research in the field of constructions that contributes to strengthening the role of construction engineering in our future society.
